

# GALACTIC KUB-BAND THERMAL SURVEY

# GALACTIC KUBAND THERMAL SURVEY

**GUTS** will..

be a homogenous survey at a high frequency,  
complementary to existing L-& C-band surveys

be the first high-resolution, large-area survey of  
primarily thermal radio emission in the Galaxy

find high frequency calibrators in the plane,  
necessary for the upgraded VLA and ALMA

provide a unique dataset for time-domain  
studies of variability and transient look-up
